

**CITY OF CORONA  
NOTICE OF COMPLETION**

**ALL AMERICAN ASPHALT SURFACE MINE PERMIT AMENDMENT  
INITIAL STUDY/SUBSEQUENT MITIGATED NEGATIVE DECLARATION**

**LEAD AGENCY:** City of Corona

**PROJECT TITLE:** All American Asphalt Surface Mine Permit Amendment

**PROJECT APPLICATIONS:** SMP2017-0101 (Surface Mine Permit Amendment), SMRP2018-0001 (Surface Mine Reclamation Plan), and DA2018-002 (Development Agreement)

**APPLICANT:** All American Asphalt, 400 E. Sixth Street, Corona, CA 92879

**PUBLIC COMMENT PERIOD:** August 27, 2018 through September 25, 2018

**The project has not yet been scheduled for a public hearing; therefore, a subsequent 20-day notice for the public hearing will be published prior to the Planning and Housing Commission hearing.**

The City of Corona is the Lead Agency in the preparation of a Subsequent Mitigated Negative Declaration for the project identified herein. The project site is located generally east of Interstate 15, south of Magnolia Avenue on the east side of All American Way. All American Asphalt (AAA) is requesting an extension to their existing surface mine permit for the quarry located at 1776 All American Way. The extension is for a period of 100 years which would extend the permit from 2021 to 2121. In addition to this request, AAA is requesting to excavate to a depth of 400 feet above mean sea level (amsl) from 500 feet amsl under their existing permit. This would increase the total reserves to 177 million tons from 112 million tons. The surface mining footprint would not expand beyond the current footprint allowed by their existing surface mine permit, which is 298 acres. The request however proposes to reduce the footprint to 263 acres based on the actual usage of the property from the quarry operation, which includes all areas used for extraction, processing and support. Mineral excavation will occur on 229.33 acres within the surface mine permit (SMP) boundary. The specific applications related to this project include:

**Surface Mine Permit (SMP) 2017-0101:** The amended permit is being reviewed under SMP2017-0101 as an amendment to existing surface mine permit SMP95-01.

**Surface Mine Reclamation Plan SMRP2018-0001:** The surface mine reclamation plan describes the reclamation that will take place once mining ceases.

**Development Agreement DA2018-002:** The development agreement allows the city to collect an extraction royalty from All American Asphalt for the duration of the permit.

**Public comments on the subsequent mitigated negative declaration are invited to be submitted in writing before September 25, 2018.** The document is available for review on the city's website at [www.CoronaCA.gov](http://www.CoronaCA.gov) under Community Development Department/Planning Division/Proposed Development/Projects (<https://www.coronaca.gov/government/departments-divisions/building/projects>). The document is also available at Corona City Hall in the Community Development Department at the below address. Comments should be sent to:
