

Project Completion Summary

- Project Title:** Street Pavement Maintenance & Rehabilitation, Project No. 2017-22
- Location:** 75 lane-miles of various local and major streets within Corona
- Description:** This Project consisted of pavement rehabilitation, slurry seal, curb ramp replacements, and other ancillary improvements. These pavement techniques will ensure longevity in the life of the asphalt, give an aged, greying surface a new appearance, provide improved vehicle traction, improve safety, and provide excellent durability in terms of cracking, aging resistance, and reduced tire noise.
- A total of 34 Americans with Disabilities Act compliant curb ramps were installed, approximately 6,556,000 square feet of streets were rehabilitated.
- Schedule:** Construction started in October 2019 and was completed in April 2020.
- Project Cost:** \$6,242,095.56
- Funding:** SB-1, Gas Tax, Measure A, CalRecycle Rubberized Pavement Grant
