Water Quality Alert
Residential Notice

COMPLETE & LEAVE FOR COLLECTION - TODAY

PUBLIC NOTICE

Water Quality ALERT

IMPORTANT INFORMATION

Presented in the Interest of Public Health & Safety

Please complete & leave at front door
for collection:

from 10am **TUESDAY**

There is Poison in the Tap Water.

WARNING: Chemicals known to cause cancer and reproductive harm are present in tap (drinking) water, which commonly contains poisons such as pesticides, herbicides and insecticides including dieldrin, DDT, chlordane, heptachlor, atrazine, aluminum, lead, chlorine, sodium hypochlorite, heavy metals, and over 50 different other types of carcinogenic, artificial synthetic chemicals of concern.

Please answer the following 6 questions:

1. Does anyone in the home suffer from Skin Irritation or Asthma?
 Yes No

Did you know...

2. Chemicals found in tap water absorb into your body when showering? Yes No

3. Bottled water commonly contains chemicals, heavy metals and other impurities? Yes No

4. Many foods cooked using tap water absorb chemical content, heavy metals and impurities? Yes No

5. Approximately 70% of your body is made of water?
 Yes No

This Water Quality Alert is conducted in areas affected by tap water contamination and/or reported water quality concerns. For useful environmental and health related information please visit www.ewg.org
To donate: www.wateraid.org

TAP WATER TESTING

We are now testing tap water in your area...

- Water Contamination Test
- Chlorine Level Check
- Recycled Sewage In Tap Water Report
- Water Quality Report

(This is a free public service - There is no cost for this service)

96% of tested bottled water does not pass tests!
We can test your bottled (or filtered) water at no charge.

6. Please select:

Yes, I want my water tested.

No, I do not want my water tested.

If No, reason: _____

You be contacted shortly to arrange a tap water test for your home

Name(s): _____ / _____

Address: _____

Phone: _____ / _____
