

# McKinley Street Grade Separation

## Project Status / Overview

The McKinley Street Grade Separation Project is set to change how you travel through McKinley Street. Recognizing the significant traffic congestion City of Corona residents and commuters face every day, the City is working to improve the crossing of the BNSF Railway and McKinley Street by building a suspension bridge to elevate McKinley Street over the BNSF railroad tracks and Arlington Channel. Construction will extend from the State Route 91 (SR-91) interchange on the north side to Magnolia Avenue on the south side and will also include connections to Sampson Avenue. New reconnector road facilities, street reconstruction and realigning and widening of SR-91 on-and off-ramps and utility relocation are also part of the construction. Once complete, the project will relieve traffic congestion, improve mobility and safety for both motorists and pedestrians, as well as improve emergency response times, air quality and noise. Construction activities began in Summer 2022.

## Project Benefits

- ✓ Reduce Traffic Congestion and Air/Noise Pollution
- ✓ Enhance Emergency Vehicular Access and Improve Response Times
- ✓ Minimize Impacts to the Community/Railroad
- ✓ Improve Safety at the Grade Crossing for Motorists, Bicyclists, and Pedestrians

## Project Schedule

- **Pre-Construction**
- Building Demolition: **May 2021 – July 2021**
- Early Third-Party Utility Relocations: **May 2021 – July 2021**
- **Construction**
- Bid Award: **Fall 2021**
- Begin Construction: **Summer 2022**
- Anticipated Completion: **Late 2024/Early 2025**
